

RECIPROCATING SPRAYER

MODEL RS-3600

These reciprocating sprayers automate the spray finishing of cabinet doors and other flat parts. A paper belt transports parts under a reciprocating spray arm. Part sensors detect the part and automatically trigger up to four spray guns. These machines can be fitted with a variety of high-pressure or low-pressure spray gun packages for applying nearly all types of sprayable coatings and finishes.

SPECIFICATIONS:

Max. Workpiece Width	32 Inches
Max. Workpiece Length	Unlimited
Feed Rate	Up to 20 Feet Per Minute
